Dear Sunny,

On behalf of the Thoracic Oncology Group of Australasia (TOGA), I would like to express my sincere gratitude for your generous support of lung cancer research. Your contribution has the potential to improve the lives of people affected by lung cancer, both now and into the future.

Through TOGA's Inspirational Research Grant program, funds raised will support projects including research into blood tests that may give doctors an earlier warning when a patient's cancer is changing, helping them make treatment decisions sooner. Support will also help advance research focused on improving care for people experiencing severe breathlessness, a symptom that can be frightening and debilitating for patients and their families.

Research breakthroughs rarely happen overnight. They begin with promising ideas, dedicated researchers and people willing to support innovation at its earliest stages. Your generosity helps make those first steps possible.

We are deeply grateful for your commitment to giving back to the community and for helping create opportunities that may lead to better outcomes for future patients and families affected by lung cancer. Thank you again for your generosity and support.

Kind regards,

Megan Sanders, PhD, CertGovNFP
